i am Gregg Marchand from Willimantic and I agree will the Judiciary committee HB No. 6387 (RAISED) AN ACT CONCERNING COURT OPERATIONS should also include prosecutors being ethical by not prosecuting cases that should be thrown out. For example Prosecutors use scare tactics such as 'if you don't plead this will go to trial and you will be looking at 3 years,' when in reality it should be dropped because of a false arrest. It was an obvious false arrest on the ground the person never committed a crime as the police report also showed no crime yet the prosecution kept continuing the case for three years three weeks until they were finally going to take it to trial. The defendants' attorney called them and said her client was ready to go to trial and ready to go to prison if need be. Fifteen minutes later defendant gets a call and the case was nollod. Is that justice it's corruption of power through the courts. Gregg marchand p.o. box 244 north windham, ct 06256
